

Eva Frankovic (724) 757-3770 / Port Washington, New York / emfrankovic7@gmail.com / [LinkedIn](#) / [Portfolio](#)

Technical Support and Software Engineer with production experience troubleshooting user-facing workflows across React, TypeScript, Ruby on Rails, Python, REST APIs, authentication systems, and relational databases. Skilled at tracing issues across the full technical stack, identifying root causes, communicating findings clearly, and collaborating with users and engineering teams to deliver reliable solutions. Use AI coding assistants daily and review their output with the same rigor as my own code.

TECHNICAL SKILLS:

Languages: Python, TypeScript, JavaScript, Ruby, SQL, PHP

Frontend: React, HTML, CSS, Tailwind CSS, TanStack Form, Zod, Jotai

Backend: Ruby on Rails, FastAPI, REST APIs, Podman

Tools: GitHub, GitLab, Bitbucket, Power BI, Power Automate, Figma, Drupal, Jira

RELATED EXPERIENCE:

Pittsburgh Supercomputing Center, Carnegie Mellon – *User Support Developer*, Pittsburgh, PA September 2025 – Present

- Build and own React and TypeScript account features, including reusable registration and profile forms, client-side validation, email verification, password management, linked accounts, and SSH-key management, used by researchers across the NSF-funded ACCESS ecosystem.
- Integrate frontend workflows with REST APIs using asynchronous state management, loading and error states, notifications, and automatic data refresh.
- Contribute to CILogon OIDC authentication, token handling, identity APIs, and registration eligibility logic.
- Build cross-application Ruby on Rails features spanning models, controllers, routes, views, permissions, and status logic.
- Develop Python FastAPI endpoints supporting identity and registration workflows.
- Debug issues across the full stack, tracing requests from React through API layers to the database and write SQL directly to diagnose identity and registration data problems.
- Collaborate through code review, requirements refinement, and production support across the ACCESS ecosystem.
- Work directly with researchers to troubleshoot account, authentication, and registration issues, identify root causes across the technical stack, and implement code changes that resolve problems and improve the user experience.

Kenvue – *Data Analyst*, Lancaster, PA

July 2024 – September 2025

- Built and maintained Power BI dashboards for manufacturing and operations, delivering timely, decision-ready insights into production performance.
- Collaborated with stakeholders to define KPIs and translate business needs into scalable data models and visualizations.
- Developed automated ETL workflows, optimized Power Query steps, and wrote advanced DAX measures (cumulative totals, weekly rollups, OEE, ahead/behind metrics) to improve reporting accuracy and efficiency.
- Analyzed production and performance data to identify trends and bottlenecks, providing recommendations that supported process optimization.
- Consolidated data from multiple systems to create unified reporting for OC/PC lines, locked plan vs. actuals, changeover adherence, and vendor normalization.

Kenvue – *Part-Time Process/Project Engineering Co-op*, Lancaster, PA

January 2024 – May 2024

- Collaborated with manufacturing and operations stakeholders to clarify reporting needs and translate source data into usable dashboards.
- Applied data analysis and root-cause problem solving to identify process-performance issues.

CS Davidson – *Software Developer Intern*, Lancaster, PA

May 2023 – August 2023

- Participated in code reviews and testing to improve implementation quality and coding discipline.
- Developed frontend features for a web mapping application, improving the user experience.
- Implemented SQL and PHP changes supporting backend data retrieval and application behavior.

EDUCATION:

Bucknell University, Lewisburg, PA

August 2022 – May 2024

BA in Computer Science

Transferred from University of Pittsburgh, 2020 to 2022. GPA 3.75/4.00, Cum Laude.

Dean's List: Fall 2022, Spring 2023, Fall 2023, Spring 2024. Women's Soccer, NCAA Division I Student-Athlete.

CERTIFICATIONS:

Codecademy, Front-End Engineer Career Path (2025) – Udemy, The Complete Ruby on Rails Developer (2025) – Coursera / Johns Hopkins University, HTML, CSS, and JavaScript for Web Developers (2024)
